

Welcome to Burton Constable Company of Bowmen

Thank you for taking the time to find out more about the fascinating sport of archery.

You are about to start a six-week course, which will provide you with suitable training and also the opportunity to practice your new skills. By the sixth week you will have become a competent and safe novice archer.

We provide all the equipment you need for the duration of your course and recommend that you do not invest in any expensive items until after successful completion. However, in the coming weeks your coach will advise you of some relatively cheap items you may wish to purchase for your own convenience.

The following notes to download and read at home contain some important information about safety and an introduction to the type of equipment you will be using.

If you have any questions at any time, please ask. We want you to enjoy the coming weeks while learning about archery and most of all - have fun!

Good luck

Burton Constable Company of Bowmen
